ADVANTAGE CREDIT INTRODUCES ONLINE FLOOD CERTIFICATIONS

PENSACOLA, Fla., May17, 2001— Advantage Credit, the nation's fastest growing credit-reporting company, announced today that the company has begun offering flood certifications online.

Advantage Credit's innovative web technology allows brokers to order Basic or Life of Loan flood certifications with the click of a mouse directly from Advantage's web site, advantagecredit.com.

Fast and convenient, the online ordering system allows brokers to order flood certifications simultaneously with credit reports for one-stop shopping. Aside from the ease ordering, additional conveniences to brokers and lenders are that all reports are itemized on one simple bill. Brokers can also realize cost savings by ordering the flood certifications themselves, forgoing the extra costs lenders or title companies will charge for the reports.

Advantage Credit provides the flood certifications to the brokers instantly if the information is present in National Flood Research's database. If hand mapping is required, the broker's request will be filled in as little as 8-10 business hours. Basic certifications are available for under \$15, and Life of Loan certifications are available for less than \$20. Prices vary based on volume.
